

GREATER SHEPPARTON SECONDARY COLLEGE

SUNSMART POLICY

Approval Date:	18 May 2022	Approved by:	School Council
Review Cycle:	Three (3) years	Next Review Date:	May 2025
Responsible for Review:	School Leadership	Initial Endorsement Date:	May 2022

PURPOSE

The purpose of this policy is to encourage behaviours at Greater Shepparton Secondary College to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

POLICY

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours.

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the free SunSmart app, or at sunsmart.com.au or bom.gov.au.

Greater Shepparton Secondary College has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Greater Shepparton Secondary College will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- where students congregate for lunch
- the canteen
- outdoor lesson areas
- popular play areas
- assembly areas
- internal bus bays

When building works or grounds maintenance is conducted at Greater Shepparton Secondary College that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sunscreen

Greater Shepparton Secondary College encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

At Greater Shepparton Secondary College students are welcome to attend House Reception to access sunscreen. Staff and students who may suffer from allergic reactions from certain types of sunscreen are encouraged to contact the First Aid Officer to implement a management plan to reduce the risk of an allergic reaction at school. Sunscreen is provided for students at camps, excursions and sporting events.

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Curriculum

Students at our school are encouraged to make healthy choices and are supported to understand the benefits and risks of sun exposure. Greater Shepparton Secondary College will address sun and UV safety education as part of Core Health and Physical Education Program at Year 7 and Year 8, and within the Social & Emotional Curriculum and Year 9 and Year 10.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

Engaging students, staff and families

SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school website/intranet, staff and parent meetings, school assemblies, student, and teacher activities and at student enrolment/new staff orientation.

Families and staff are provided with information, ideas, and practical strategies to support UV safety at school and at home.

The Greater Shepparton Secondary College SunSmart policy is published in the Staff Handbook and staff are regularly encouraged to model SunSmart behaviours to our students and families.
